Great time at Riverside, huge crowds, beyond all expectations, super time had by all. More later.

This morning, I announced the second annual NorCal QRP fundraiser for St.

Aidans Church in Rochdale England. George Dobbs is the Vicar of St. Aidan's and last year NorCal sponsored a raffle to benefit St. Aidan's and QRPers raised \$700 for the cause.

This year I have enlisted the help of some of the vendors and qrp clubs. Here is a partial prize list:

Elecraft Radio - K2 Kit
Red Hot Radio - Red Hot 40
Small Wonder Labs - DSW20+
MFJ - MFJ 15 Meter Cub
Vern Wright Super Antennas - MP-1 with all accessories
Dennis Foster TeNeKe's - 2 TeNeKe's
NJQRP Club - Warbler, Manhattan Starter Kit + Others
St. Louis QRP Club - St. Louis Quickie Kit
Ft. Smith QRP Club - VE3DNL Kit, Tuna Tin 2 Kit
Arizona Scorpions - Stinger Singer Kit
NorCal QRP Club - BLT, SMK-1, Toroid Kit

Last year one winner won all of the prizes. This year we are going to spread it out. One prize per ticket. In other words, one ticket will win the K2, another will win the Red Hot 40, etc.

Tickets? To enter the raffle, please send a \$5 bill with your call sign on it and it will be entered into the drawing box. The drawing will be held at 8:00 PM at Pacificon on Saturday night October 20, 2001. You may enter as many times as you wish. To enter, send your marked \$5 bill to:

Doug Hendricks
ATTN: St. Aidan's Fund
862 Frank Ave.
Dos Palos, CA.

Need not be present to win. Prizes will be mailed if not in attendance. All proceeds go to St. Aidan's. All prizes have been fully donated. NorCal will pay any prize mailing costs.

Thanks for your support of this worthy cause. Good luck, and I hope you win the K2 for \$5. 72, Doug

Happy to see ssb for a QRP contest! I will be operating from Sussex County in Delaware. It's the same weekend as my oldest sons BSA beach clean-up. If I had known before I scheduled an astronomy demo, I could have been on the air longer. As it is, I do my best for the rare county. 73, Steve WB3LGC

Still thinning the herd with ultimate goal of one rig that does it all (K-3 that covers 6, 2 and 440??):

MFJ-9406 with mike, manual and CW board installed. Works FB, looks great. Making lots of contacts on 6 during VHF contest. CW is a real help - instant cross mode is a lot of fun.
\$165 shipped in US

Tokyo Hy-Power HT-750 7/21/50 MHz QRP SSB/CW Handheld HT
Reviewed in QST (Oct '94, pp 60-63)
Digital (LCD) readout, 2 - 3 watts out on 7 & 21 MHz, 2 watts on 50 MHz.
(Depends on use of internal batteries or external PS).
Comes with:

1. Whip antenna and loading coils for 40, 16 and 6 meters
2. THP Leather case
3. THP Speaker Mike
4. Original instruction book

This rig, case and accessories are in excellent, almost new, condition. No wear at all and read out is crystal clear. Works very well when used with a real antenna, as opposed to the whip. You can get out well on CW with the whip, especially on 15 & 6 if you use a counterpoise. With a long wire and antenna tuner, I have worked around the world on both SSB and CW. With a dipole or better, you would have no problem at all.

This is a rare rig that is no longer in production and will probably never come back into production (though THP has made several promises).

\$575 shipped in US. Willing to trade for a FT-817 :-). Actually, would consider trading both rigs for a FT-817.

72/73,

Steve, N4EUK
Reston, VA

I am interested in buying a QRP radio.
I don't have time to assemble a kit myself
but don't mind buying one someone else put together
as long as it works well .
I am interested in CW on 20m and or 40m.
I need help in your opinion on the various radios
out there.... pros and cons.
I would rather wait to buy "the right radio" the first time.
Thank you for any insight you can give me.

I recommend an Elecraft K1, a dual band radio with full 5-watt capability.

Problem is that it *is* a kit; but likely you could buy a used one or get someone to build one for you.

You might want to subscribe to the Elecraft email reflector at

<http://www.elecraft.com>

where you can find out more about that radio. It was recently (this year, I think) reviewed in QST, too.
